Summary

M.Tech student in Computer Science and Engineering at NIT Jalandhar with strong foundations in data structures, algorithms, and core computer science concepts. Proficient in C++ and JavaScript with interest in backend and full-stack software development. Seeking Software Development Engineer roles to build reliable, scalable, and maintainable applications through strong problem-solving and engineering skills.

Education

M.Tech in Computer Science and Engineering 2025 – Present

Dr. B.R. Ambedkar National Institute of Technology (NIT), Jalandhar

CGPA: 7.86 / 10.0

B.Tech in Computer Science and Engineering 2021 – 2025

Dr. A.P.J. Abdul Kalam Technical University (AKTU), Uttar Pradesh

CGPA: 7.92 / 10.0

Experience

Teaching Assistant Sep 2025 – Present

Dr. B.R. Ambedkar National Institute of Technology (NIT), Jalandhar

- Assisted faculty in conducting tutorials, laboratory sessions, and doubt-solving classes.
- Mentored undergraduate students in data structures, algorithms, and programming fundamentals.
- Supported evaluation of assignments and provided feedback to improve code quality and logic.
- Strengthened communication, mentoring, and technical explanation skills.

Projects

E-Commerce Order Management System (MERN Stack)

- Designed and developed a full-stack e-commerce system using MongoDB, ExpressJS, ReactJS, and NodeJS.
- Implemented user authentication and authorization using JSON Web Tokens (JWT).
- Built core features including product listing, cart management, and order placement.
- Designed MongoDB schemas for users, products, and orders.
- Developed RESTful APIs and integrated them with a React-based frontend.

Task Management System (MERN Stack)

- Developed a task management application using the MERN stack.
- Implemented CRUD operations for tasks with user-specific access control.
- Built REST APIs for task creation, update, deletion, and retrieval.
- Focused on clean code structure, modular components, and maintainability.

User Authentication System

- Built a secure user authentication system using NodeJS, ExpressJS, and MongoDB.
- Implemented features such as user registration, login, logout, and password hashing.
- Applied middleware-based request validation and error handling.
- Strengthened understanding of authentication workflows and backend security basics.

Technical Skills

Programming Languages: C++, JavaScript

Core CS Concepts: Data Structures, Algorithms, OOP, Operating Systems, DBMS

Backend & Web Development: REST APIs, Backend Development, Full-Stack Development

Frameworks / Libraries: NodeJS, ExpressJS, ReactJS

Databases: MongoDB

Tools: Git, GitHub, VS Code, LaTeX

Relevant Coursework

Postgraduate: Advanced Data Structures

Undergraduate: Design and Analysis of Algorithms, Operating Systems, Database Management Systems, Software Engineering

Achievements & Activities

- Strong command over Dynamic Programming, Trees, Graphs, and Recursion.
- Qualified GATE examination and secured admission to a National Institute of Technology.
- Actively engaged in problem solving and self-learning of web technologies.
